

Taking the lead in zero emission boats

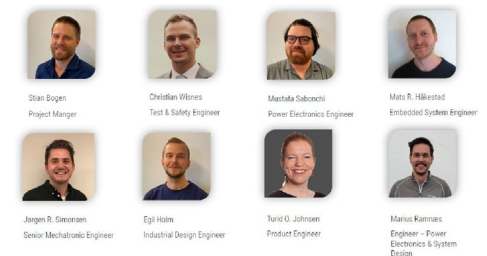

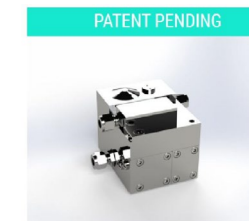

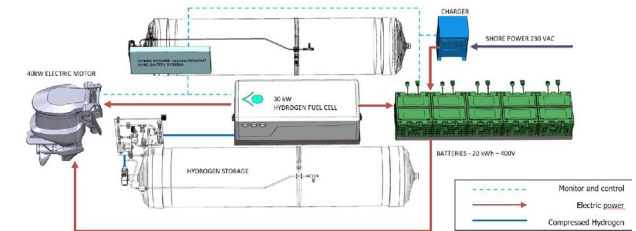

HYREX28 prototype launched in March 2022

Hyrex has offerings in several hydrogen markets

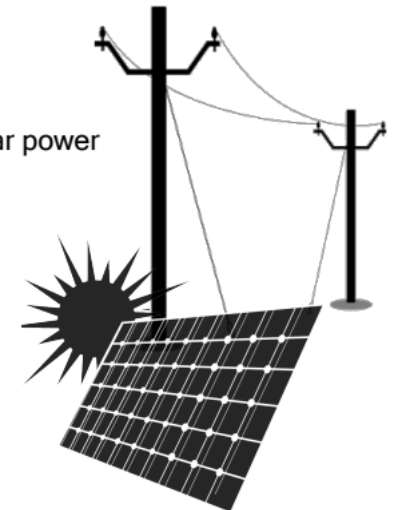

- Hyrex 28, 36, 42 complete hydrogen-electric boats
 - Boat pools
- HyBoost propulsion systems for boat builders
 - Pleasureboat industry
 - Commercial projects (Taxiboats, SAR vessels)
 -
- HyValve components for system integrators
 - Safety valves
 - Pressure regulators
- Hydrogen technology and safety engineering
- ..and now also HyFloat CH2 fillingstations

HyFloat CH2 refuelling station

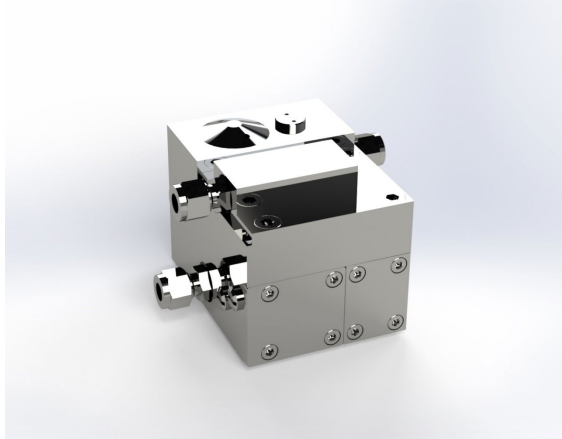

- Reduced production costs with solar power
- On site hydrogen production
- Good storage capacity
- Fully autonomous
- Standardized fueling

Flow control valve

Compressed hydrogen cut-off in
abnormal situations

PATENT PENDING

Flow Stabilized Blow-out Valve

Emergency release of compressed
hydrogen

PATENT PENDING

HYREX has committed and reliable partners in every part of the value chain 

Taking the lead in zero emission boats
